

Imagine Collection

Imagine

The Imagine Collection uses the most current breakthrough in digital ceramic printing. This technological development is used to apply imagery, patterns or text to the surface of flat glass. The ceramic pigments are first printed, then fused to the glass at tempering, resulting in an impression that is resistant to light and scratches.

Each of our designs is available for printing on Satin White glass or Clear glass. Therefore we invite you to choose your own degree of privacy for your unique door.

Custom built to your specifications, your space and your satisfaction. Imagination begins here.
